

# Valentine's Melted Beads

These turn out VERY pretty and you can also hang them in the window like a sun catcher.

## Materials:

- Pony beads
- Metal cookie cutters
- Old pan to place them on and put in the oven

## How to make:

1. Place the pony beads in a metal cookie cutter on a cookie sheet
2. Heat oven to 350 degrees
3. Place cookie sheet in over or 15-20 minutes (make sure beads are melted)
4. Take out of oven and let them cool.
5. After beads are cool will pop out of cookie cutters.

Then you can place a magnet on the back or ribbon using glue gun.

You can make them into magnets, ornaments, sun catchers or you can glue them to wood to make a plaque.
